

EnerCorp, LLC is a private equity sponsored oilfield services company with operations in Canada and the United States. EnerCorp offers innovative technologies produced in North America that deliver engineered solutions throughout the lifecycle of your well; our services streamline wellbore construction and minimize NPT to reduce costs and maximize production. We design, build, sell, and rent various products in our technology portfolio while also providing application engineering and field services on job sites. This holistic end-to-end capability allows us to optimize our products and services in a cost-effective manner while improving our expertise through a continuous feedback loop.

DUTIES AND RESPONSIBILITIES

The Driller oversees all duties pertaining to the rig. This includes: operational and mechanical knowledge of **atlas copco rd20 xc**, triplex pumps, duplex pumps, trash pumps, operating tongs and wrenches for making/breaking pipe, setting and pulling slips, top drives, enclosed mud systems, downhole knowledge of drilling, drill fluids, inspections, JSAs, training, computer skills (Microsoft Excel & Word), coordinating rig moves and routes, read and understand RRC well programs, coordinate with company man representatives on drilling operations and procedures, stabbing pipes and performing other necessary tasks to drill a well. In this role, one will also assist the Driller in the operation of the drill floor including hydraulics, mud circulating system, rotary system, handling tools and equipment.

Specific Responsibilities
